NEWS- MORA FARM NOW FULLY ORGANIC

Anyone who came early to the Liskeard Show and managed to get some of Oli's truly amazing strawberries will know of Ollo Fruit, based at Mora Farm close to St Neot.

Oli Baker who started his growing life at Keveral and who then moved to Mora farm to establish his own business put the farm into organic conversion and it has just finished the conversion period and is now certified as fully organic.

Oli said 'I would like to send a big thanks out to all the customers who have supported me through the conversion period' Mora Farm products can be found in our boxes (your lovely bunches carrots, white and red currents and strawberries, beetroots, rhubarb and Romanesco brocolii to name a few) and on his farm gate stall and at Beddoes greengrocers in Liskeard. He also supplies some of the countries best restaurants. Congratulations Oli.

Help us keep box prices down. Always put your name as a reference for any online payments otherwise we don't know who has given us the money! We get plenty of anonymous payments through the year.

Community of Growers goes plastic free. !

Yes its true. We have started a trial of new packaging for the few things we need to put in bags. The new bags which look a bit like plastic film are made of a wood cellulose product called Natureflex. Its made from wood pulp and is fully compostable. Please let us know how it works

for you, is the salad fresh, do the seals on the bag last long enough for it to get to you in good condition?

Help us keep box prices down. Please help us look after the boxes. They cost £1.70 each. Please take your veg out when its delivered, wipe the box out and store and return it to us on your next delivery.

Liskeard Show a great success

It was a great year at the Liskeard Show with the fine weather bringing out the crowds.

James, Bill and Michelle had a fine time on our stall and saw many of our existing customers and signed up some new ones. A big WELCOME to your box scheme for all our new customers.

(UN) HAPPY GLOBAL OVERSHOOT DAY

After so much good news I feel sad to have to draw attention to some grim reality.

According to the Global Footprint Network, who study the ecological footprint of humanity on the planet, today August 1st is the day that we collectively have consumed all the renewable biological resources that our planet has generated this year. From this point on we are consuming the natural 'capital' that would have supplied our needs if we were living sustainably so that there will be less resources for us all next year. For details see.
