Local - Organic - Fresh

NEWS- Its ORGANIC SEPTEMBER

So even though we name our newsletters by the month just ended we thought we would celebrate. Having more than a hundred lovely veg box customers supporting us by buying our produce is very important for getting us through the winter too. Please tell your friends about us as our aim is to try and reach two hundred families.

Help us keep box prices down. Please help us look after the boxes. They cost £1.70 each. Please take your veg out when its delivered, wipe the box out and store and return it to us on your next delivery.

MORA FARM GETS NEW POLYTUNNEL

Sheltered cropping is a very important part of keeping our growing going through the winter and keeping up that cash flow to support farms through to next spring.

Oli who has recently been supplying the interesting and amazing coloured carrots into your boxes has just managed to erect his nice new tunnel, just in time for winter planting.

You can expect to get early carrots, spinach, spring onions and other yummy greens from this tunnel in the spring, we may even get some new potatoes. The tunnel has special domes built on the ends to accommodate seedlings and sunbathing farmers.

Happy polytunnel builders grabbing a rest.

Help us keep box prices down. Always put the name your box is ordered under as a reference for any online payments (not your partners name or if you have recently married and the name on your account has not yet changed not your maiden name!) otherwise we don't know who has given us the money! We get plenty of anonymous payments through the year.

Extreme weather is hard to plan for. Summer holidays are over and so we expect the sun to come back out soon. However the extreme weather has brought many crops on early. We have had masses of berries earlier than ever but they have stopped sooner too. The broccoli in boxes recently was planted to be here in October but rushed ahead. Many of the other plants are now behaving like autumn has properly arrived rather than gently transitioning from one season to another.

We are all trying to learn how best to plan and manage our growing and to allow flexibility with our crop planning over all the growers to make sure we don't all get the same things at the same time and so we can keep providing a good variety of crops to you. But its tricky. Once we have committed to planting one crop we can only influence how quickly it develops a little.

That said we are looking forward to supplying you with more lovely autumn and winter crops as the summer heat loving plants are finishing over the next month and we are busy planting for the winter.
